**Written Report Received:**

**Clean Up Concluded:**

**Risk Evaluation:**

At this time are no reasons to suspect any atmospheric or health hazards.

**Areal Extent:**

**Potential Environmental Impacts:**

The potential environmental impacts are to the well/facility soils as well as the soils off site that were impacted by the fluids leaving the site during the time of the release.

**Action Taken or Planned:**

The site has been shut in, and the load lines have been locked out. There will be some removal of material from within the boundaries of the site. For the offsite impacts, the saturated soil will be removed and soil borings and samples will be taken to determine further scope of work. If any ground water is discovered during initial excavation work, more aggressive methods will be taken at a sooner time rather than waiting for samples.

**Wastes Disposal Location:** The waste will be disposed of at an approved waste disposal facility

**Agencies Involved:** Local Law Enforcement
